# Explanation of new ASBV's in Glendemar MPM ram sale catalogue

With the use of full genomics measurement and more data capture points, we have introduced more ASBV's for your selection. As with any new traits it may take a few years for accuracies to get to an acceptable level.

Different environment and production systems will require a different focus on Production and Animal Health, Welfare and Labour-saving traits. Have a targeted Breeding Objective and select on a balance of traits for your individual system.

More traits selected for the slower progress can be. Some traits are antagonistic against each other.

If you have any questions either call myself Ben, 0427 354535 or email [glendemar@gmail.com](mailto:glendemar@gmail.com)

## ANIMAL HEALTH AND WELFARE TRAITS

**EBWR** - Early Breech Wrinkle, measure wrinkle score at lamb marking. Lower the better

**PWEC** - Post Weaning Worm Egg Count, measured through individual worm egg counts. Lower the better

## REPRODUCTION TRAITS

The following traits are a breakdown of the old Number of Lambs Weaned (NLW) ASBV and all impact reproduction is slightly different ways.

**WR** – Weaning rate, number of lambs weaned per ewe joined. Higher the better.

## POLL/HORN

**PP/PH** – measures if ram has a double poll (PP) copy or single (PH) copy

## 2023 Semen Sire List
